Pega Cloud Adoption Suite

Transforming Pega applications with Speed, Security and Scalability

Overview

Smart upgrades are no longer just a choice; they are the key to staying ahead in a digital-first world. Businesses can't afford delays in modernizing their applications. Traditional upgrade models are slow, costly, and risky. As customer expectations evolve and technology advances, enterprises require a smarter, scalable, and lower-risk approach to upgrading their Pega applications.

Challenges

Organizations face multiple hurdles with legacy upgrade models:

Time-consuming and resource-heavy processes

High maintenance costs with limited scalability

Security vulnerabilities and compliance risks

Limited readiness for AI adoption

Uncertainty in upgrade timelines and outcomes

Solution

LTIMindtree's Pega Cloud Adoption Suite delivers a structured, cloud-based solution that accelerates transformation while minimizing disruption.

Our five-stage approach ensures a seamless, efficient upgrade journey:

1 **Assessment and Planning:** Define cloud strategy, set up environment, and design migration architecture

2 **Cloud Migration:** Prepare the environment, package the code, and optimize performance

3 **App Migration and Remediation:** Rule skimming, code fixes, and comprehensive testing

4 **App Validation:** Validation testing, monitoring, and sign-off

5 **Data Migration and Go Live:** Dry run, final cutover, and retrospective

Benefits

Up to 40% faster time-to-market	**30% improvement in process efficiency**	**20-30% lower maintenance costs**	**99.95% application availability**	Enhanced automation and compliance adherence	Future-ready architecture leveraging **Gen AI and agentic AI**

Why LTIMindtree?

1   Deep expertise in Pega platforms with proven success stories

2   Prior experience in cloud migration, remediation, and platform support

3   Offshore-based delivery model for cost efficiency

4   Flexible service packages tailored to complexity

5   Proprietary accelerators to expedite the migration journey

6   Technical modernization: UI, integration, authentication upgrades

Accelerating the Transformation

We bring in a purpose-built accelerator that automates the remediation of the most common legacy design pitfalls during Pega Cloud migration. Leveraging our deep migration expertise, it automatically transforms outdated constructs into scalable, cloud-compliant solutions, making modernization faster, smarter, and more reliable.

Case Study

Migrated a major FMCG platform to the cloud, addressing application remediation, platform optimization, and DevOps automation. Enhanced scalability with serverless architecture, externalized services, and redesigned databases. Integrated SNOW-based deployments and SRE practices, achieving improved performance, cost efficiency, and operational resilience across 120+ QPs, 30 schedulers, and 20 SAP integrations.
