# LTIMindtree Cyber Risk Management Service

Next evolution in enterprise cyber risk and security / Translate cyber risk into business growth / Manage cyber risk effectively, explicitly
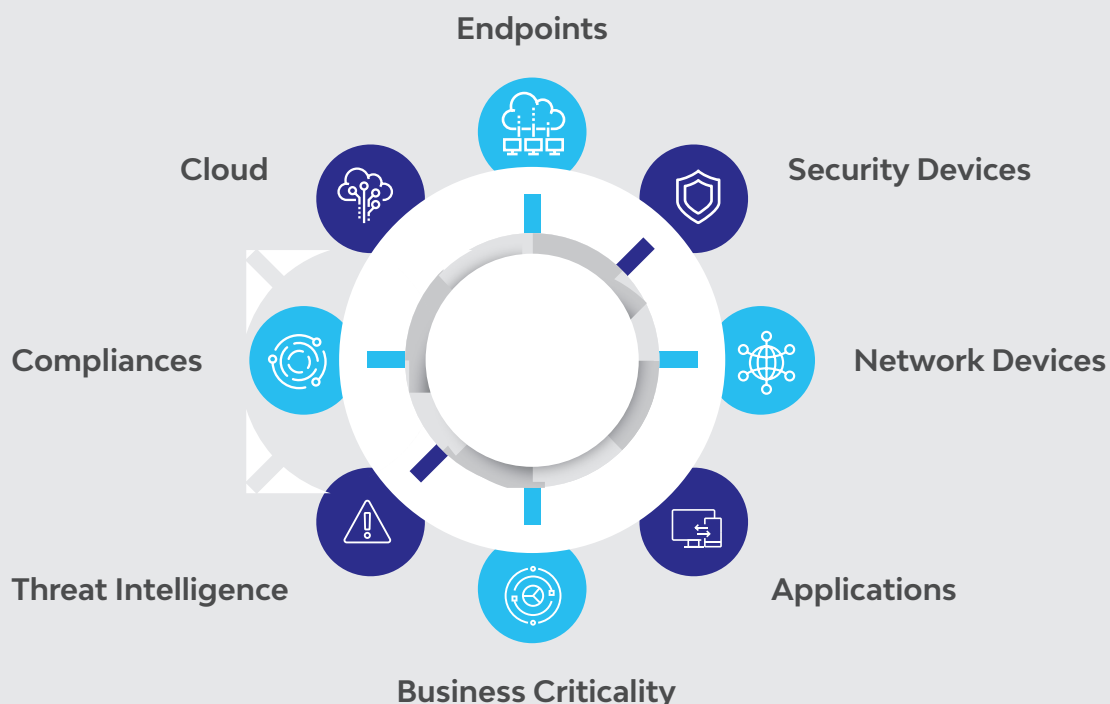

Overview

Organizations today are facing extreme challenges in terms of protecting their data systems and networks. Boards of over 70% organizations review cyber risk and compliance reports of their IT infrastructure resulting from audits typically conducted once or twice a year. By then any critical information impacting decisions is already stale. Any Cyber Risk Management program needs to address this problem by providing continuous reports and compliance posture for informed decision-making. It should provide accurate and updated information covering all of the enterprise infrastructure and applications. What organizations need is a service that will help them track high-risk assets and applications, and prioritize remediation efforts based on risk. The LTIMindtree Cyber Risk Management Service provides continuous risk-based visibility into enterprise assets and applications, as well as the associated attack surface area.

Contextual and quantified risk-based score

Automated workflows in the VM domain through integrations with ticketing solutions and so on

Continuous view of cyber security posture

Highlights

Prioritized remediation advisory for vulnerabilities

Visibility into the cyber risk exposure across infrastructure and applications

AI-driven threat analytics by correlating internal security intelligence and external threat data feeds

The LTIMindtree Approach

The LTIMindtree Cyber Risk Management (CRM) Service ingests information from internal security intelligence (vulnerability scanning tools both infra and application) and external threat data feeds. This technology-enabled service aggregates, analyzes and correlates these data feeds with its business criticality to quantify the organization's risk score at multiple levels. By doing so, it not only provides valuable threat attribution but also directs focus to those security gaps being actively exploited by cyber adversaries. This service uses advanced analytics as well as human-interactive machine learning technology to continuously measure, monitor, and track overall exposure to risk by providing security risk scores and visual representation of cyber risk posture at the organization, business unit, technology and host level.

Key Features and Benefits

The LTIMindtree Cyber Risk Management Service focuses on weaponized vulnerabilities relevant to the organization, particularly the ones most popular and trending in the wild. Instead of sorting through thousands of vulnerabilities, this service focus on the areas that the real attacks will target. Automated workflows speed up the vulnerability management program. Quantified risk scores enable organizations to prioritize remediation efforts and get continuous visibility into the attack surface area across the infrastructure assets and applications.

FEATURE	BENEFITS
Visibility into threats	• Aggregate vulnerability data and view exposure across infrastructure and applications
Drill down dashboard	• Visibility of risk scores across assets and applications, threats, vulnerabilities, open issues, closed issues, remediation advisories, trend analytics etc. • Aligned to various stakeholder requirements
"Always On" security risk score	• Quantified risk score view on a continuous basis of every infrastructure asset and application level in the organization based on vulnerability, threat, exposure, business criticality etc.
Threat intelligence	• Enables focusing on threats relevant to the organization leading to proactive security measures
Quick remediation	• Enables prioritized remediation and automated ticketing workflows. Turns discrete time-consuming tasks into automated processes

About LTIMindtree

LTIMindtree is a global technology consulting and digital solutions company that enables enterprises across industries to reimagine business models, accelerate innovation, and maximize growth by harnessing digital technologies. As a digital transformation partner to more than 700 clients, LTIMindtree brings extensive domain and technology expertise to help drive superior competitive differentiation, customer experiences, and business outcomes in a converging world. Powered by 84,000+ talented and entrepreneurial professionals across more than 30 countries, LTIMindtree — a Larsen & Toubro Group company — solves the most complex business challenges and delivers transformation at scale.
