LTIMindtree

GeoSpatial **NxT**

Spatial data Collection, Integration and Insights

GeoSpatial NxT offers a wide portfolio of products and solutions that cater to the needs of a diverse set of industrial sectors. Whether our clients are using location intelligence for strategic business planning or coordinating construction and maintenance activities in the field, GeoSpatial NxT offerings can help them collect and analyze spatial data to produce real-time location insights that help optimize efficiency, improve safety and reduce costs.

Meaningful ROI and Future-Readiness

LTIMindtree leverages advanced technologies across the entire location information value chain—data collection, processing, analysis, visualization, and integration with various enterprise systems—to empower our customers across sectors with the spatial insights they need to augment their decisions in a time-efficient and cost-effective manner.

740 GeoSpatial/ GIS projects	140 Photogrammetry LiDAR projects	15 BIM GIS Integration scan to BIM solution

Our products and solutions bring tangible outcomes for our clients, including:

20% reduction in labor hours	20% improvement in field productivity	10% increase in construction design efficiency

Products and Solutions for Every Industry

LTIMindtree GeoSpatial NxT products and solutions enable data visualization, workflow productivity, and information exchange among engineers, project managers, business leaders and other stakeholders across a variety of industries—including utility, telecom, retail, BFSI, mining, and government. Customers rely on our products and solutions to aggregate spatial data from multiple sources, and then convert that into actionable insights, which can be visualized through our highly intuitive and easily configurable GIS platform. Our offerings are used to keep construction projects on schedule, maintain road safety, ensure resilient power grids, design civil infrastructures, and optimize supply chain routes. Other high-value use cases include a variety of targeted interventions based on the location data of consumers, businesses, equipment, or assets.

Turn Industry 4.0 into a Growth Engine

Want to know more about how GeoSpatial NxT is part of a holistic approach to a profitable Industry 4.0 transformations? Visit to learn how LTIMindtree is enabling organizations to engage customers like never before, anticipate their needs, and respond with incredible speed and precision.

About LTIMindtree

LTIMindtree is a global technology consulting and digital solutions company that enables enterprises across industries to reimagine business models, accelerate innovation, and maximize growth by harnessing digital technologies. As a digital transformation partner to more than 700 clients, LTIMindtree brings extensive domain and technology expertise to help drive superior competitive differentiation, customer experiences, and business outcomes in a converging world. Powered by 81,000+ talented and entrepreneurial professionals across more than 30 countries, LTIMindtree — a Larsen & Toubro Group company — combines the industry-acclaimed strengths of erstwhile Larsen and Toubro Infotech and Mindtree in solving the most complex business challenges and delivering transformation at scale.
