**Brochure**

Sunshine
FinOps

Enables visibility and provides insights on utilization and cost parameters of Azure data services to establish a cloud discipline.
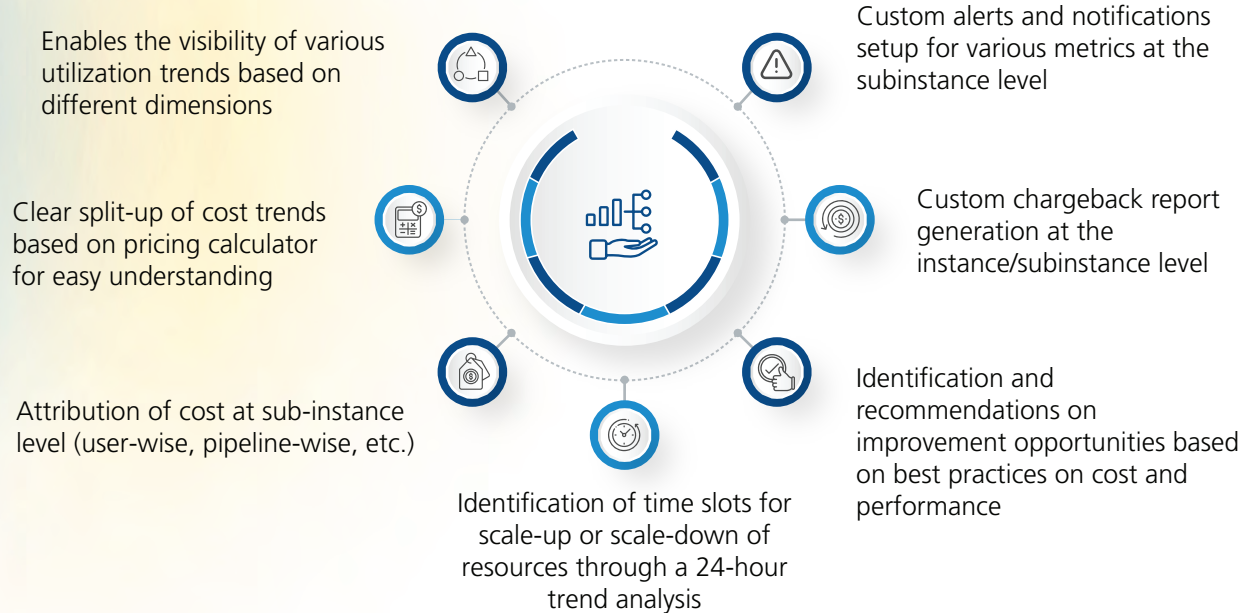

Challenges

While cloud modernization provides various advantages, it could also be challenging and uncontrolled if not adequately monitored and governed. Substantial cost overruns and reduced business benefits can be the result of the following:

Poor understanding of the costing model

Poor attribution of costs, lack of monitoring and control

Lack of clear ownership, improper usage of features

Oversized and idle resources

Ignorance of implicit and hidden costs

Solution

Sunshine FinOps offers a comprehensive solution for utilization monitoring and cost optimization for various Azure data services.

A. Features

Enables the visibility of various utilization trends based on different dimensions

Custom alerts and notifications setup for various metrics at the subinstance level

Clear split-up of cost trends based on pricing calculator for easy understanding

Custom chargeback report generation at the instance/subinstance level

Attribution of cost at sub-instance level (user-wise, pipeline-wise, etc.)

Identification and recommendations on improvement opportunities based on best practices on cost and performance

Identification of time slots for scale-up or scale-down of resources through a 24-hour trend analysis

B. Benefits

Up to **40%** increased visibility on utilization and costs across Azure data services

Experience a **10–20%** increase in performance through optimization recommendations

Experience a **10–20%** cost reduction through targeted recommendations and alerts

30% increase in sub-instance level chargeback accuracy

Supported Data Services

LTIMindtree advantage

- With a long-term relationship with Microsoft, LTIMindtree is uniquely positioned as an Azure Expert Managed Services Provider (MSP) and a Microsoft Solution Partner with expertise across all six Microsoft solution areas.

- We have a long-standing comprehensive relationship with Microsoft as a strategic partner, vendor, and customer.

- We strive to optimize clients' businesses and enhance cloud transformation benefits by understanding Azure cloud monitoring, service costs, and cloud best practices and implementing those to provide detailed information and optimization recommendations in Azure.
