Ensuring a Seamless S/4HANA Transition with LTM's

RELY.AI Framework

Why Enterprises Must Ensure Noiseless S/4HANA Deployments

SAP S/4HANA transformations are complex, requiring significant investments and a well-defined testing strategy. Traditional testing approaches often lack the agility needed to keep pace with transformation initiatives. While automation enhances accuracy, enterprises still face hurdles such as skill gaps, high upfront costs, and the inability to scale testing across dynamic business environments.

A seamless deployment minimizes business disruption, accelerates adoption, and ensures long-term system reliability. LTM's Noiseless S/4HANA Deployment approach, powered by AI and Generative AI, delivers comprehensive business process assurance by integrating continuous automation and intelligent testing to mitigate risks, optimize costs, and enable a transformed business experience.

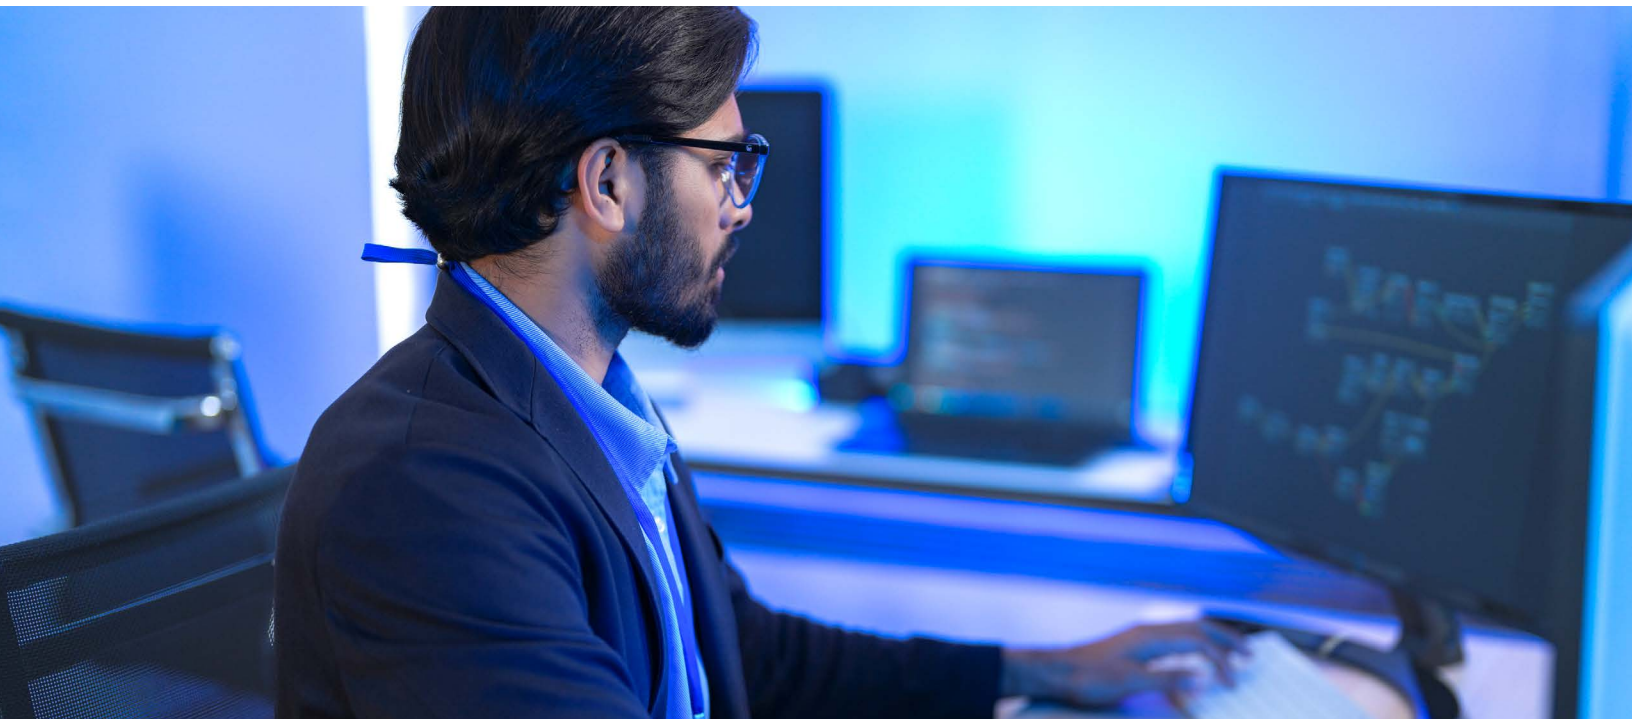

With extensive experience across industries, LTM brings deep expertise in enabling intelligent, future-ready enterprises. Our cross-industry capabilities help organizations modernize operations, streamline processes, drive intelligent automation, improve supply chain resilience, and accelerate digital transformation.

LTM's RELY.AI Framework

Intelligent Testing for Risk-Free Deployments

At the core of this approach is LTM's RELY.AI Framework, an integrated SAP program quality assurance and compliance framework designed to simplify and de-risk S/4HANA implementations. RELY.AI combines AI-driven validation with Impact-Based Testing and DevOps methodologies, ensuring a well-orchestrated transition with minimal disruption.

The integration of Generative AI further enhances the framework's capabilities, enabling smarter and more efficient test automation. RELY.AI has been co-innovated with Tricentis, combining LTM's in-house accelerators with Tricentis' proven testing solutions.

Key Components

TestAcademia

A reusable repository of:

- 5,000+ standard SAP S/4HANA manual test cases
- 500+ Tosca automated test scripts
- Self-healing and Vision AI-based automation components

TestGenius

A GenAI-powered test case builder that:

- Automates test case creation
- Uses SAP business process models and process diagrams
- Accelerates test design and improves coverage

ART (Advanced Reporting Tool)

Provides:

- Automated reporting
- Quality dashboards
- Data-driven testing insights and analytics

Tricentis Tool Suite

Includes:

- Tosca
- qTest
- NeoLoad
- LiveCompare

Enables enterprise-grade end-to-end SAP testing and automation.

Challenge	LTM Solution	Business Benefit
Lack of targeted testing	End-to-end continuous testing and monitoring	Comprehensive business process assurance
Limited visibility into test coverage	GenAI-enabled test generation and reusable test library	~50% reduction in test creation effort and >95% test coverage
Inefficient regression testing	LiveCompare-based impact analysis	Reduced regression scope and ~50% faster execution
Lack of CI/CD integration	Improved deployment and automation practices	Near-zero defect leakage into production

Key Components

Persona-Driven Solution for SAP Business Suite

- Expands testing coverage through impact-based testing
- Industry-specific testing accelerators

DataFabric – Intelligent Data Management

- Extracts real-time data
- Integrates with automation tools
- Ensures data security and compliance

Enhancing User Experience & Validation

- Maintains SAP Fiori consistency and responsiveness
- Supports role-based access and security validation
- Generates persona-based reports

TestAcademia

- Self-healing and Vision AI-based automation
- Supports future-ready S/4HANA implementations, upgrades, and enhancements

TestGenius – GenAI-enabled Test Case Builder

- AI-driven test generation
- Uses SAP business process models and process diagrams
- Accelerates test creation and improves quality

LTM is a global technology services and consulting company and the Business Creativity partner to the world's largest and most disruptive companies. We bring human insights and intelligent systems together to help enterprises across industries rewire their business models, accelerate innovation, and drive AI-centric growth. With our integrated operations, transformation, and business AI services, we design and deliver solutions that create new productivity paradigms and new roads to value. Together with 87,000 employees across 40 countries and our global network of hyperscaler partners, LTM — A Larsen & Toubro company — owns business outcomes for over 700 clients, helping them to not simply outperform the market, but to Outcreate it.
