

Press release

LTM to Deliver Sovereign Cloud and AI in Europe through Strategic Partnership with OVHcloud

Roubaix – June 29, 2026 – [OVHcloud](#), a global cloud player and the European Cloud leader, and LTM, the Business Creativity partner to the world's largest enterprises, today announced a strategic partnership allowing LTM to deploy sovereign AI solutions in Europe. Aimed at enabling organisations to achieve technological sovereignty for critical workloads, the deployment will also accelerate sustainable AI adoption. Through OVHcloud's open, trusted cloud, extensive presence and AI infrastructure in Europe, LTM will target new markets, further pushing their sovereign AI ambitions in the region.

As enterprises across industries require cloud environments that are secure, scalable, open, compliant with regulations and support high-performance computing and data-intensive AI workloads, the OVHcloud-LTM partnership will address these challenges through standardised industry blueprints without compromising sovereignty, innovation or speed. This partnership integrates OVHcloud's trusted sovereign cloud infrastructure designed for data control, regulatory compliance and sustainability with LTM's deep industry expertise and AI-powered transformation capabilities.

OVHcloud and LTM will collaboratively focus on highly regulated and data-sensitive sectors such as banking, financial services, insurance, healthcare, public sector, manufacturing and telecoms, enabling industrialised, sovereign-ready cloud architectures tailored to industry-specific requirements. Together, OVHcloud and LTM will enable enterprises to modernise their cloud environments with faster AI adoption while maintaining full control over data, costs and technology choices.

Leveraging LTM BlueVerse, the AI-native ecosystem, LTM will also enable enterprises to build and scale intelligent, agent-driven solutions that are industry-ready and secure by design. Additionally, LTM will deliver end-to-end consulting, migration, modernisation and AI engineering services to support adoption of OVHcloud's portfolio including sovereign AI Cloud, hosted private cloud, Public Cloud and high-performance bare-metal infrastructure.

“Enterprises today are looking beyond cloud adoption; they are demanding sovereignty, transparency and performance at scale,” said **Terry Maiolo, Vice President-General Manager Asia Pacific, OVHcloud**. *“By partnering with LTM, we are combining our sovereign cloud infrastructure with deep transformation and AI expertise to help organisations build trusted, future-ready digital foundations.”*

*“This partnership reinforces LTM’s commitment to helping enterprises become AI-native while remaining compliant, resilient and in control,” said **Krishnan Iyer, Chief Growth Officer, LTM.** “Together with OVHcloud, we are delivering an open-core model that helps organisations on their journey toward technology sovereignty, enabling them to scale AI responsibly and cost-effectively while meeting all regional regulatory requirements.”*

As an Elite Partner of the OVHcloud Partner Network, LTM will help businesses adopt sovereign AI by building their services through OVHcloud’s Infrastructure-as-a-Service solutions, with a particular focus in European markets. By combining OVHcloud’s open and sustainable cloud platforms with LTM’s industry-aligned AI and cloud transformation capabilities, the alliance provides enterprises with a clear path to adopt next-generation cloud and AI solutions built on trust, openness and long-term value.

About OVHcloud

OVHcloud is a global cloud player and the leading European cloud provider operating over 500,000 servers within 46 data centers across 4 continents to reach 1,6 million customers in over 140 countries. Spearheading a trusted cloud and pioneering a sustainable cloud with the best performance-price ratio, the Group has been leveraging for over 20 years an integrated model that guarantees total control of its value chain: from the design of its servers to the construction and management of its data centers, including the orchestration of its fiber-optic network. This unique approach enables OVHcloud to independently cover all the uses of its customers so they can seize the benefits of an environmentally conscious model with a frugal use of resources and a carbon footprint reaching the best ratios in the industry. OVHcloud now offers customers the latest-generation solutions combining performance, predictable pricing, and complete data sovereignty to support their unfettered growth.
